

Developing Touch Practice

Now to develop touch, that delicate, accurate weight control that the Professionals make look like magic.

Place the colours on their spots.

Place the cue ball on the table somewhere between the blue spot and the Baulk line.

Hitting the cue ball at the Natural Roll position, pot the Yellow and have the cue ball rebound off the side cushion so that you have position on the Green. Do NOT use any side, only Natural Roll and weight.

Similarly, pot the Green, then Brown, Blue Pink and Black.

After potting Pink, you should leave the cue ball somewhat level with the Black so that after potting Black, you can get the cue ball to rebound off the side cushion and back close to your original starting position.
